حذف رفرنس های تکراری

هنگام جستجو در پایگاه های مختلف به دلیل همپوشانی این پایگاه ها ممکن است رفرنس های تکراری وارد بانک اطلاعاتی شما شود. برای حذف این موارد، این نرم افزار به طور اتوماتیک رفرنس های تکراری را پیدا می کند. برای حذف این موارد تکراری مراحل زیر را انجام دهید:

۱. انتخاب گزینه Find Duplicate از تب Reference
۲. در کادر باز شده، دو ستون وجود دارد که در هر ستون مشخصات رفرنس های تکراری به همراه شماره رفرنس است. از شما خواسته می شود تا یکی از رفرنس ها را نگه داشته و دیگری حذف می شود. این کار تا به اتمام رسیدن رفرنس های تکراری، تکرار می شود.

The development of miniature sensors that can be unobtrusively attached to the body or can be part of clothing items, such as sensing elements embedded in the fabric of garments, have opened countless possibilities of monitoring patients in the field over extended periods of time. This is of particular relevance to the practice of physical medicine and rehabilitation. Wearable technology addresses a major question in the management of patients undergoing rehabilitation, i.e. have clinical interventions a significant impact on the real life of patients? Wearable technology allows clinicians to gather data where it matters the most to answer this question, i.e. the home and community settings. Direct observations concerning the impact of clinical interventions on mobility, level of independence, and quality of life can be performed by means of wearable systems. Researchers have focused on three main areas of work to develop tools of clinical interest: 1)the design and implementation of sensors that are minimally obtrusive and reliably record movement or physiological signals, 2)the development of systems that unobtrusively gather data from multiple wearable sensors and deliver this information to clinicians in the way that is most appropriate for each application, and 3)the design and implementation of algorithms to extract clinically relevant information from data recorded using wearable technology. Journal of NeuroEngineering and Rehabilitation has devoted a series of articles to this topic with the objective of offering a description of the state of the art in this research field and pointing to emerging applications that are relevant to the clinical practice in physical medicine and rehabilitation.(1)

آماده سازی مقاله برای ارسال به مجله

برای ارسال مقاله به مجله مورد نظر نیاز است که فایل مورد نظر از حالت اندنوت خارج شود. بدین منظور باید مراحل زیر را انجام دهید.

۱. انتخاب گزینه **Convert citation and Bibliography** از تب اندنوت
۲. انتخاب گزینه **Convert to Plain Text** از کادر باز شده.
۳. در کادر باز شده از شما می پرسد که مطمئن به انجام این کار هستید، با انتخاب گزینه **Ok** فایل جدیدی برای شما ایجاد می شود که باید آن را با نام مورد نظر خود ذخیره نمایید.

پس از انجام این مراحل، فایل مقاله از حالت اندنوت خارج می شود. توجه داشته باشید که در این حالت اگر رفرنسی را بین رفرنس های قبلی اضافه نمایید، از شماره ۱ شروع خواهد شد و یا در صورت نیاز به حذف یک رفرنس، شماره های رفرنس ها خودبخود عوض نمی شود و شما مجبور به روزآمد کردن رفرنس های خود به صورت دستی هستید. بنابراین به خاطر داشته باشید که همیشه یک نسخه از فایل نهایی مقاله خود در حالت اندنوت نگه دارید تا در صورت نیاز به حذف یا اضافه کردن رفرنس، بتوانید از آن استفاده نمایید تا ترتیب رفرنس های شما به هم نخورد.

Obese patients have an increased risk of developing acute myeloid leukemia (AML), which in turn predisposes to malnutrition. Obesity has been associated with improved survival in critically ill patients (obesity paradox), but this effect seems to disappear when adjusting for malnutrition. How obesity and malnutrition interplay to affect mortality in critically ill patients with AML has not been addressed and was the objective of this study. Baliakas, Hadzidimitriou (1)
